## Parents and Guardians,

Below are the instructions for getting your student successfully logged onto their Chromebooks. Student usernames will be their Student ID number. That number is located on their plastic ID issued to them. It can also be found within the JPAMs/JCAMPUS parent portal.

We have reset all BJH students' passwords to a one time temporary password. Please follow the instructions carefully below.

- 1) Log onto this website from any electronic device (laptop, personal computer, or cell phone) <https://identity.stpsb.org> **DO NOT ATTEMPT THIS STEP ON THE CHROMEBOOK**
- 2) Use your child's Student ID number as the username. This never changes. This Student ID number is located on their plastic ID or within JPAMs/JCAMPUS.
- 3) Enter this one-time temporary password: Boyet123 (this will work one time)
- 4) Immediately, it will prompt you to change your student password because the one you received is expired.
- 5) Change the student password. We recommend that students use a name they are familiar with, although not their first or last name, the month, and four digit year, with a special character (For example: Sally92020#)
- 6) Write this down. Passwords expire for STPPS systems every 30 days. Please encourage your students to be independently responsible for keeping their passwords updated.
- 7) Once you have reset the student password, the student should be able to effectively log-in to any STPPS server portal. They should now be able to log-in to their Chromebooks. Make an attempt to connect the Chromebook to home WIFI. When student get to school, they will receive instructions from their teachers on how to log-on to the STPPS WIFI.
